Open to remote work and relocation

SUMMARY

Software engineer (B.S., highest academic honors) with production experience across full stack and data. I build end-to-end products with TypeScript/React, Python/FastAPI, PostgreSQL and dbt — from database to browser. Shipped a multi-tenant SaaS and public data products used at national scale.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL
Front-end: React, Next.js, HTML/CSS
Back-end: Node.js, Fastify, FastAPI, REST APIs, Prisma
Data: PostgreSQL, MySQL, Redis, dbt, Pandas, Power BI, DAX, Streamlit, ETL/ELT
Cloud & DevOps: Docker, GitHub Actions, CI/CD, Linux, Git

EXPERIENCE

IT Assistant — Rede Nilo Supermarkets, Goiás, Brazil | Sep 2026 – Present
- Provide L1/L2 support for 80+ POS terminals across 7 stores, diagnosing and resolving hardware/software failures.
- Manage MySQL users, roles and permissions for hundreds of users; analyze and correct fiscal receipts.
- Roll out and support self-checkout lanes and the TOTVS ERP across the store network.
- Build internal tools and automations that reduce manual work and improve efficiency across 7 stores.

Software Development Intern — Gigabyte Soluções, Remote | Aug 2025 – Dec 2025
- Built a web module (HTML/CSS/JS + Python/FastAPI) integrated with a legacy desktop ERP database.
- Designed test plans and led application QA/homologation before client delivery.
- Wrote user manuals, process specifications and support reports.

Systems & Customer Service Operator — Quiosque Barra Chopp, Barra do Garças, Brazil | Jan 2021 – Jan 2025
- Operated the integrated management system (NooChef), maintaining product data directly in the database.
- Built the official website (barrachopp.com), from design to deployment.
- Handled day-to-day customer service at the kiosk.

PROJECTS

MEIFlow — Multi-tenant finance SaaS for 15M+ Brazilian micro-entrepreneurs (Next.js/React, TypeScript, Fastify/Node.js, PostgreSQL/Prisma, Redis, Docker). AI expense categorization (Claude API), CNPJ validation and R$81k revenue-limit alerts; JWT auth, BullMQ queues and CI/CD.

BrasilBid — ETL pipeline (PNCP API into PostgreSQL/Neon, transformed with dbt) powering a public Power BI dashboard tracking R$8B+ across 27 federal units (26 states + DF) and 1,400+ agencies.

CerradoWatch — Environmental ETL (INPE/NASA FIRMS/INMET) with dbt and a live Streamlit dashboard, orchestrated weekly via GitHub Actions.

SaúdeBR — DATASUS/OpenDataSUS pipeline into a PostgreSQL star schema and a 3-view Power BI report with DAX KPIs per 100k inhabitants.

BarraChopp — Institutional website (HTML/CSS/JS) designed, built and deployed, with menu, WhatsApp contact and responsive layout.

EDUCATION

Bachelor of Science (B.S.) in Software Engineering — Centro Universitário de Goiás (UniGOIÁS), Goiânia · 2026
Graduated with highest academic honors (laureate).

CERTIFICATIONS & LANGUAGES

Google/Coursera — Crash Course on Python (2025); Mate Academy — JavaScript Essentials (2026)
Languages: Portuguese (native) · English (fluent) · Spanish (advanced)
